

DEPARTMENT OF THE NAVY  
OFFICE OF THE SECRETARY  
1000 NAVY PENTAGON  
WASHINGTON, D.C. 20350-1000

04

7 September 2001

The Honorable Richard B. Cheney  
President of the Senate  
United States Senate  
Washington, DC 20510

Dear Mr. President:

The purpose of this letter is to notify you of our decision to study certain functions performed by military and civilian personnel in the Department of the Navy for possible performance by private contractors.

As the Department seeks ways to improve efficiency and effectiveness, reduce the overall cost of operations and improve business processes, we are fully exploring opportunities for competition initiatives. In accordance with 10 U.S.C. Section 2461, the Secretary of Defense is to notify Congress of any decision to study commercial or industrial type functions performed by 50 or more civilian employees for possible outsourcing and to provide an estimate of the costs and length of each study. To provide you with a more comprehensive overview of our most recent competition initiatives, we are enclosing a list detailing functions both above and below 10 U.S.C. Section 2461 reporting threshold. These initiatives to study the performance of the commercial or industrial type functions by persons who are not civilian employees of the Department of Defense are not the result of constraints or limitations in terms of man years, end strengths, full-time equivalent positions or maximum number of employees. Please note that to ensure we obtain economies of scale, most of the smaller numbers of functions will be consolidated into larger regional or base-wide cost comparisons.

Where required, studies will be performed under the procedures set forth in Office of Management and Budget (OMB) Circular A-76. The military billets listed in the enclosure have been identified for A-76 studies that will determine whether the function will be contracted out or performed by civilian employees of the Department of the Navy. The Department's estimated cost to study each full-time equivalent position is \$2,000, and the estimated study time for single function studies is 12-18 months and 24-36 months for

20014128006386

multifunction studies. The Budgetary Line Item (4A1M - Administration) contains \$40.2M for these studies in FY2001.

Conversion to commercial contracts will occur only if the cost comparison process reveals that contracting is the most cost effective method of performing the function. We will notify you by separate correspondence if the competition results in a decision to convert to contract performance.

While this letter is fully responsive to the A-76 notification requirements, kindly be advised that the Navy is studying alternate approaches to competitive outsourcing. Although it is critical that we obtain the benefits currently available through A-76, in the Department of the Navy's judgment, extensive changes need to be made to this process to achieve full benefits. Accordingly, the Department of the Navy will be working with other service secretariats and OSD to provide future recommendations for change.

A similar letter has been sent to Speaker Hastert, and Chairmen Inouye, Levin, Lewis and Stump. If I can be of further assistance, please let me know.

Sincerely,

A handwritten signature in black ink, appearing to read "Gordon R. England". The signature is written in a cursive style with a large initial "G".

Gordon R. England  
Secretary of the Navy
