

THE UNDER SECRETARY OF THE NAVY
WASHINGTON, D.C. 20350-1000

17 July 2000

The Honorable Albert Gore, Jr.
President of the Senate
Washington, DC 20510

Dear Mr. President:

The purpose of this letter is to notify you of our decision to study certain functions performed by military and civilian personnel in the Department of the Navy for possible performance by private contractors.

As the Department seeks ways to improve efficiency and effectiveness, reduce the overall cost of operations and improve business processes, we are fully exploring opportunities for competition initiatives. In accordance with 10 U.S.C. Section 2461, the Secretary of Defense is to notify Congress of any decision to study commercial or industrial type functions performed by 50 or more civilian employees for possible outsourcing and to provide an estimate of the costs and length of each study. To provide you with a more comprehensive overview of our most recent competition initiatives, we are enclosing a list detailing functions both above and below 10 U.S.C. Section 2461 reporting threshold. These initiatives to study the performance of the commercial or industrial type functions by persons who are not civilian employees of the Department of Defense are not the result of constraints or limitations in terms of man years, end strengths, full-time equivalent positions or maximum number of employees. Please note that to ensure we obtain economies of scale, most of the smaller numbers of functions will be consolidated into larger regional or base-wide cost comparisons.

Where required, studies will be performed under the procedures set forth in Office of Management and Budget (OMB) Circular A-76. The military billets listed in the enclosure have been identified for substitution by civilian workers. The A-76 studies in each case will determine whether the function will be contracted out or performed by civilian employees of the Department of the Navy. The Department's estimated cost to study each full-time equivalent position is \$2,000, and the estimated study time for single function studies is 12-18 months and 24-36 months for multifunction studies.

Conversion to commercial contracts will occur only if the cost comparison process reveals that contracting is the most cost effective method of performing the function. We will notify you by separate correspondence if the competition results in a decision to convert to contract performance.

A similar letter has been sent to the Speaker of the House of Representatives. As always, if I can be of further assistance, please let me know.

Sincerely,

A handwritten signature in black ink, appearing to read "Jerry MacArthur Hultin". The signature is written in a cursive style with a large initial "J" and "M".

Jerry MacArthur Hultin

THE UNDER SECRETARY OF THE NAVY
WASHINGTON, D.C. 20350-1000

17 July 2000

The Honorable J. Dennis Hastert
Speaker of the House of Representatives
Washington, DC 20515

Dear Mr. Speaker:

The purpose of this letter is to notify you of our decision to study certain functions performed by military and civilian personnel in the Department of the Navy for possible performance by private contractors.

As the Department seeks ways to improve efficiency and effectiveness, reduce the overall cost of operations and improve business processes, we are fully exploring opportunities for competition initiatives. In accordance with 10 U.S.C. Section 2461, the Secretary of Defense is to notify Congress of any decision to study commercial or industrial type functions performed by 50 or more civilian employees for possible outsourcing and to provide an estimate of the costs and length of each study. To provide you with a more comprehensive overview of our most recent competition initiatives, we are enclosing a list detailing functions both above and below 10 U.S.C. Section 2461 reporting threshold. These initiatives to study the performance of the commercial or industrial type functions by persons who are not civilian employees of the Department of Defense are not the result of constraints or limitations in terms of man years, end strengths, full-time equivalent positions or maximum number of employees. Please note that to ensure we obtain economies of scale, most of the smaller numbers of functions will be consolidated into larger regional or base-wide cost comparisons.

Where required, studies will be performed under the procedures set forth in Office of Management and Budget (OMB) Circular A-76. The military billets listed in the enclosure have been identified for substitution by civilian workers. The A-76 studies in each case will determine whether the function will be contracted out or performed by civilian employees of the Department of the Navy. The Department's estimated cost to study each full-time equivalent position is \$2,000, and the estimated study time for single function studies is 12-18 months and 24-36 months for multifunction studies.

Conversion to commercial contracts will occur only if the cost comparison process reveals that contracting is the most cost effective method of performing the function. We will notify you by separate correspondence if the competition results in a decision to convert to contract performance.

A similar letter has been sent to the President of the Senate. As always, if I can be of further assistance, please let me know.

NAVY COMPETITIVE SOURCING PROGRAM

THE COST COMPARISON PROCESS

OMB Circular A-76 dictates use of a structured cost comparison process to determine the most efficient and cost effective way to perform the function undergoing review.

The A-76 process consists of the development of three main items:

1. A performance work statement (PWS) and a quality assurance surveillance plan detailing the performance requirements associated with the function. The PWS forms the basis for a solicitation of offers from the private sector;
2. A most efficient organization (MEO) which identifies the most efficient way for government employees to perform the function. The MEO typically incorporates improvements over the existing methods of performance; and,
3. A cost estimate, which develops the cost of the MEO, and the ancillary costs of a conversion to contract. The cost estimate is reviewed by an Independent Reviewing Officer (IRO) for adherence to A-76 procedures. After any appropriate adjustments are made, the cost estimate is sealed and submitted to the contracting officer for use in the cost comparison.

Per Navy Policy, management solicits the active participation of the affected employees in the development of the PWS and MEO.

The cognizant Navy contracting officer issues a request for proposal (RFP) from private firms that may be interested in performing the functions identified in the PWS. The contracting officer selects the most advantageous private sector offer and then compares its costs, including the conversion costs and the costs of contract administration, with the government's cost estimate. If the total cost of contracting is ten percent lower than the government's estimate, the function is tentatively designated for conversion to contract. If not, the MEO is tentatively designated for implementation.

In either case, a final decision is not made until all interested parties have been offered opportunities to review and appeal the results of the cost comparison. All appeals are reviewed by an independent appeals officer, who then makes adjustments as appropriate, and announces the final decision.
